## More musical enjoyment for one and all

Yamaha applied 100 years' experience in crafting acoustic pianos to bring you the CVP Series which, like all Clavinovas are, first and foremost, pianos. For unrivalled sonic realism there's Yamaha's proprietary Dynamic Stereo Sampling AWM tone generation. As a further step towards providing the ultimate piano sound, CVP Series models also feature stereo samples of a specially selected Yamaha CFIIIS concert grand. Plus the GH (Graded Hammer effect) for incredibly natural touch response. But that's not all. The new extra-large LCD makes operation incredibly easy and offers a score display for more performance versatility and learning support than ever. Which adds up to more musical pleasure for the whole family. All from beautiful, naturally finished instruments that are at home in any modern interior.

### Smooth, Easy Operation And Score And Lyric Indications With The New LCD Display (Colour on the CVP-209/207)

The CVP-203/205's large black and white LCD display and the CVP-209/207's even larger colour LCD display provide attractive graphics and helpful messages for quick access and error-free operation every time. Display indications include music scores (CVP-209/207/205) and lyrics for expanded performance versatility as well as karaoke fun. And with the CVP-209/207, you can enjoy playing while a scene of your choice is displayed, which can even be a picture you took with a digital camera.

### Sweet! Live! Cool! Natural! And Other Great Voices

For a new level of performance versatility, Yamaha offers a huge selection of over 800 voices. Besides incredibly realistic Piano voices and XG voices, these include new Sweet, Live, Cool and Natural voices. With Sweet voices, you can enjoy delicate nuances such as the vibrato of wind and brass instruments. Live voices provide stereo samples that capture the unique characteristics of acoustic instruments. In the same way, Cool voices reproduce the subtlest shades of the original sound of electric instruments. Created with the latest technologies, Natural voices use a huge amount of memory to assure incredibly faithful reproduction of instrument sounds. The CVP-209/207 also let you create original organ sounds with the Organ Flutes voices. Playing the Voice demo lets you hear exactly what amazing voices you have to choose from.

# Cutting-edge technology for more fun

### Session And Piano Combo Accompaniments For More Stylistic Freedom & A New Music Finder

You get a choice of built-in Normal, Session, Pianist and Piano Combo accompaniment styles covering virtually any musical genre. What's more, each style has three intros and endings, four variations, four fill-ins and one break. Using these accompaniment styles lets everybody, even beginners, give accomplished solo performances. *Music Finder* offers an extensive range of music styles with pre-programmed voices and effects setups. You can search for suitable styles by music, style, genre, keyword, tempo and beat. Whatever your selected style, *Music Finder* lets you enjoy the most suitable instruments and effects, all carefully chosen by professional musicians.

### Play And Sing! It's Easy With Guide Lamps And Karao-Key

The convenient Follow Lights function provides guide lamps over the keyboard light to show you which notes to play. When enjoying karaoke, you can also take advantage of Karao-Key. This lets you control the timing and tempo of the karaoke accompaniment to match your singing simply by hitting any key on the keyboard. Or you can use Vocal CueTIME (CVP-209/207 only) to start the accompaniment music as soon as you sing in the correct pitch.

### Come visit [yamahamusicsoft.com](http://yamahamusicsoft.com) and discover a wider world of music!

Use your Internet connection to take advantage of a virtually limitless selection of the most up to date music software and accessories to enhance your Clavinova experience. The great new [yamahamusicsoft.com](http://yamahamusicsoft.com) website has something for everyone, whether playing, listening, or singing along. Custom-designed song software for your Clavinova gives you a wide range of professionally programmed backing tracks and songbooks for you to play along with, including all styles of music and a wide array of popular songs. Style Disks provide an authentic sounding rhythm section to accompany your playing in various styles, and for budding composers, there's XGworks – a superb compositional tool which allows creative harmony between the Clavinova and the PC.

Most exciting of all, Yamaha has entered into agreements with the world's major music publishers and digital sheet music developers to give you direct access to a massive catalogue of digital score data, ready to download and be displayed right on the Clavinova LCD screen (CVP-207/209 only).

So whatever your needs, a bigger world of music is waiting for you now.
